

Durable . Modern . Affordable awnings

Skyon – a remarkable new awning product as unique as its name, is made using state-of-the-art 100% “green” polymer materials from Germany to create an elegant and durable window or door awning.

Skyon awnings are designed to add aesthetical appeal and function to any building, as its name implies our awnings allows natural “sky” light to filter through its transparent surface whilst blocking 99% of harmful UV rays. Available in an array of colours to match the décor of your building’s exterior, Skyon awnings are a breath of fresh air over other dated alternatives and are a must have for any residential or commercial building to protect their windows, doors and shop fronts from the harsh Caribbean weather.

Our awnings are sleek and modern in design and are cost effective to install, its unique design also allows for continuous installation spanning over long corridors or walkways.

### Some benefits of using Skyon awnings:

- **Aesthetics** – Provide cover to patios, windows, doors, verandas, shop fronts, corridors, walkways, A/C units etc, and adds to the aesthetics, elegance and beauty of your building.
- **Saving Construction Costs** – Skyon awnings provide you with extra space in your house, unit, apartment or commercial establishment without construction costs. They are also significantly less expensive than any permanent construction, and are like adding an extra room.
- **Self-Cleaning** – Little to no maintenance necessary as it cleans itself with every rainfall.
- **Durable** – Provides incredible strength & durability and a sturdy well-made design. Does not rust or corrode from sea blast.

- **Anti-UV Protection** – Providing an easy and economical solution from the sun & rain, giving you 99% UV Protection, whilst allowing natural light to pass through.
- **Flame & chemical resistance** – Our awnings are specially coated with a unique formula to protect them from cleaning chemical and damaging elements of heat and fire, high flame performance rating is class B1.
- **Easy assembly & Installation (D.I.Y)** – Put it together yourself using the supplied instruction booklet for a quick & easy installation process, you can finish installation within 5 minutes easily.
- **Impact resistant** – 250-300 times stronger than ordinary glass and 20-30 times that of acrylic sheeting. The impact strength is 10-27 times as much as Plexiglas.
- **Environmentally friendly** – Do your part in helping preserve our planet, Skyon awnings are made from 100% new materials which can be recycled.
- **Lightweight** - One-third the weight of acrylic, or one-sixth as heavy as glass.
